

GenAI Chat

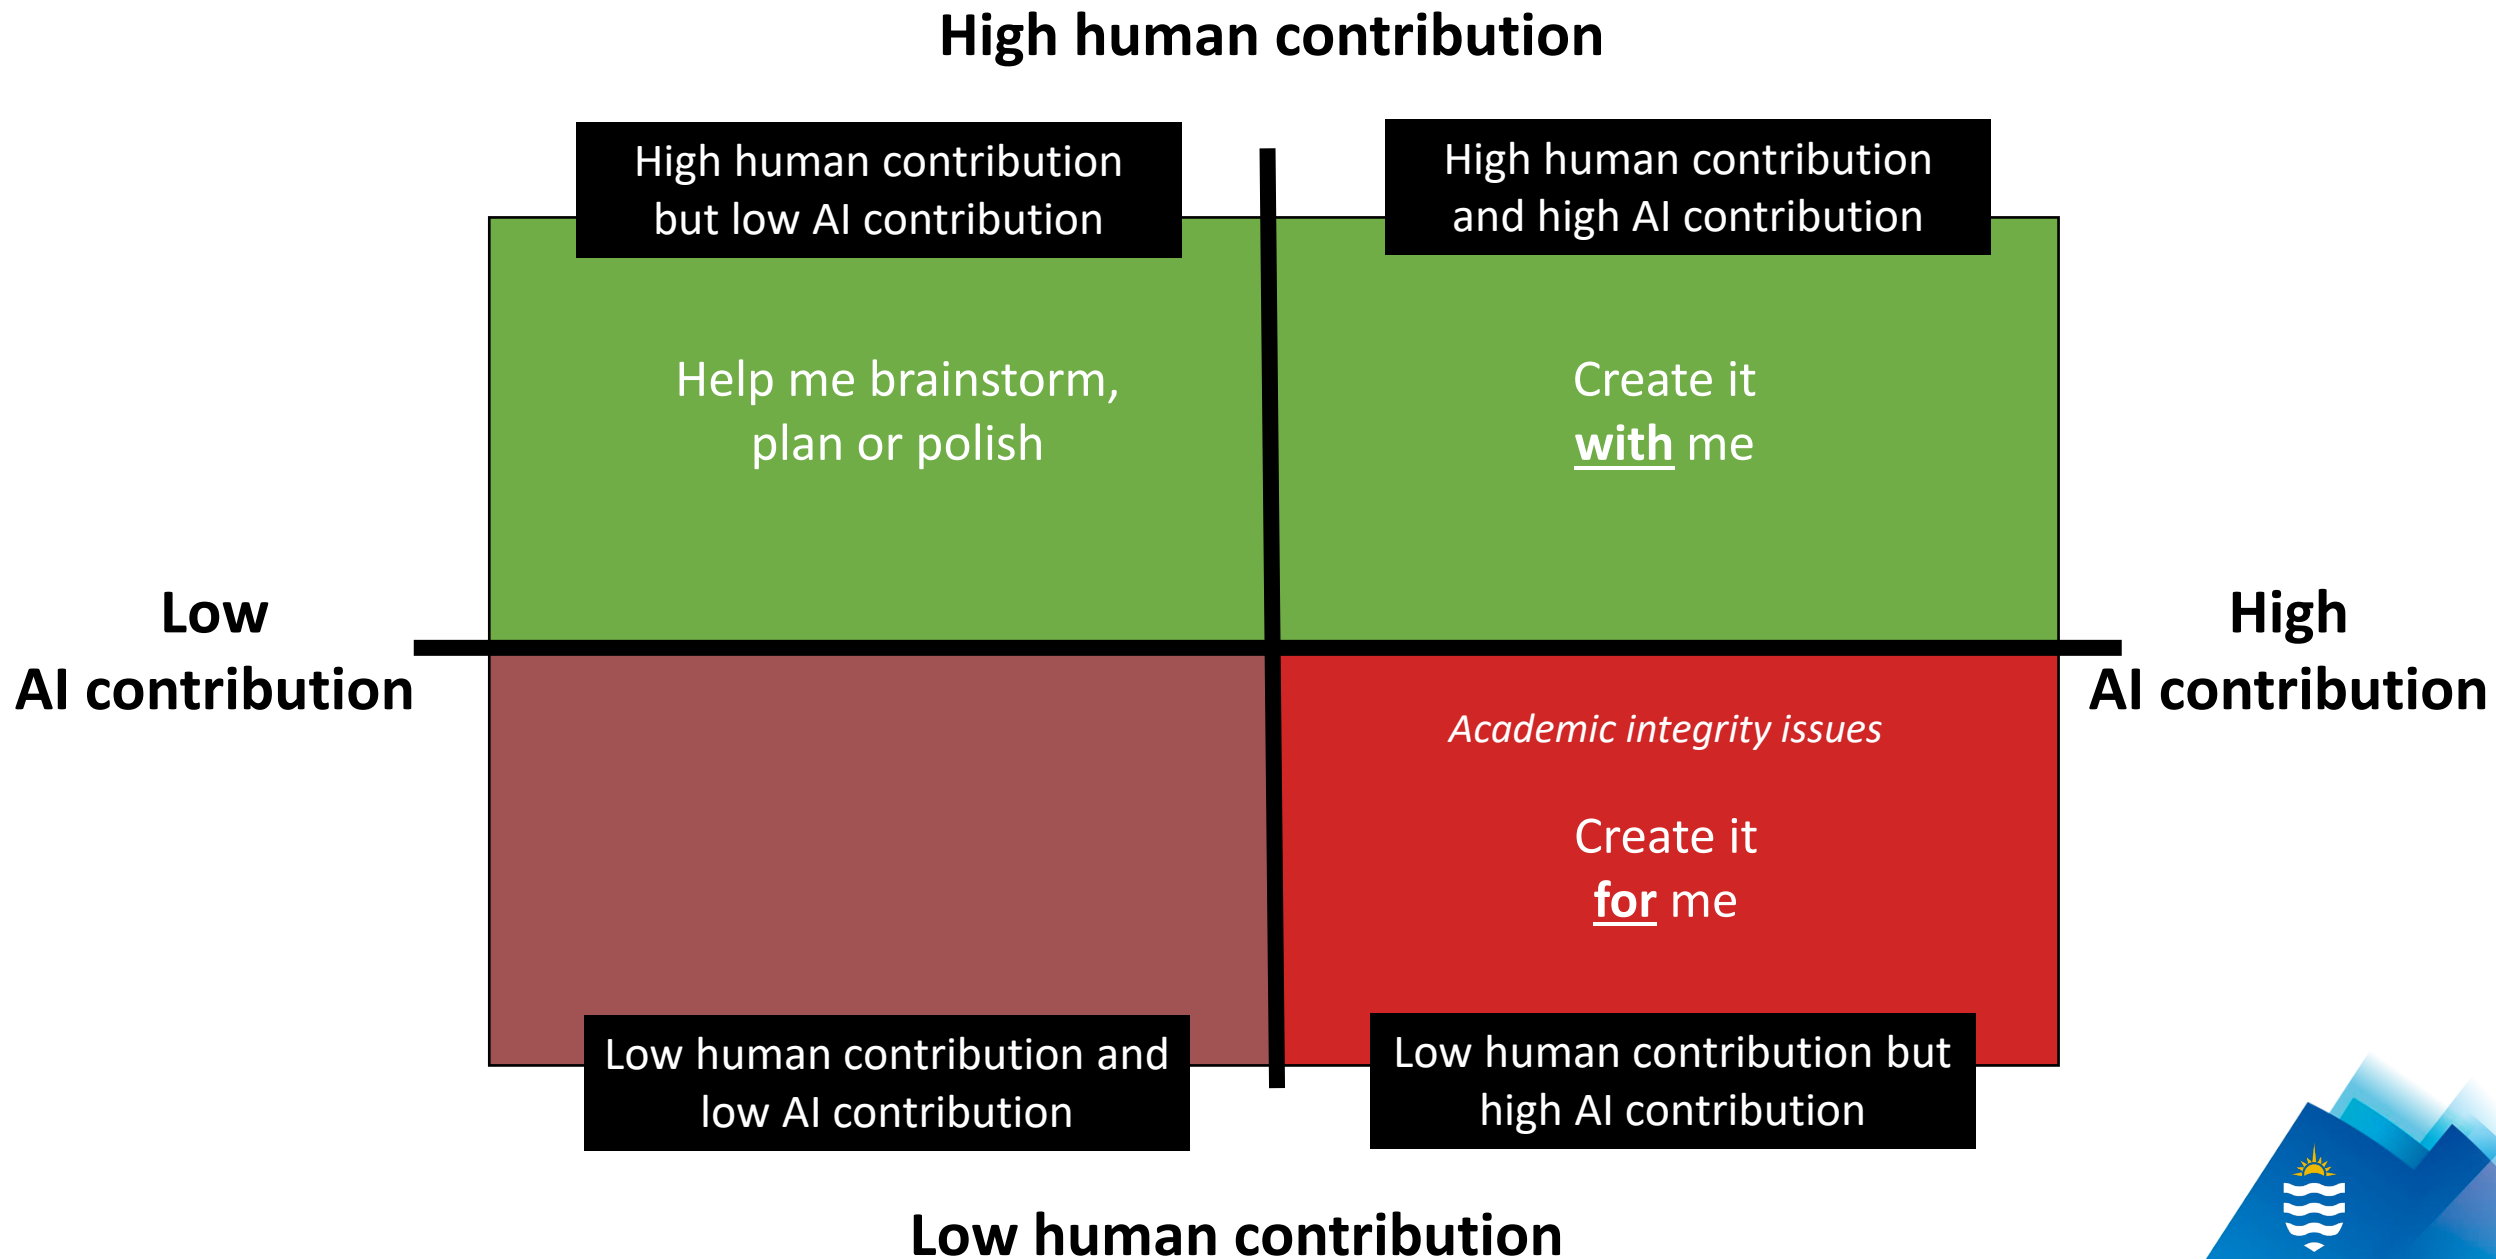

Some real talk about GenAI use in education

Educator's positionality

My research focuses on the intersections of data, technology and their societal impacts, with a particular interest in human-computer / human-AI interaction and how big data and algorithms impact our everyday lives.

Diffusion of innovations theory

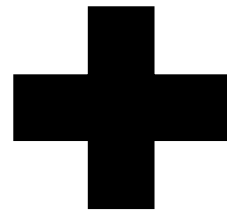

Critical and ethical use of GenAI

- Understand the limitations of AI
- Observe that AI writing is robotic
- Give AI clear objectives that help in generating ideas and outlining structures rather than writing entire assessments.
- Break down the tasks into smaller steps
- Be transparent about your use of AI and give proper attribution
- Look at guidelines on how to prompt your chosen GenAI technology
- Do your research properly and wisely. In other words, use AI as a supplement not a replacement for your own critical thinking and analysis.
